To Council,

This air compressor is a critical item to our WWTP operations and we've been putting a "Band-Aid" on the issue for quite some time. Bottom line, if we have a catastrophic failure and DEQ gets involved, it will not look good that we knew a problem existed without action taken. I agree with Rob that the procurement necessary and it directly relates/supports why we have and need the 20% reserve charge, currently proposed in the new water rates. Without the passing of increased water rates, such items would become an issue throughout the fiscal year.

I've spoken to Gladys and Rob at length about this procurement and we believe that this is qualified under our emergency procurement policy and we have received three quotes which have been analyzed (with recommendation) from Reid Engineering (see below). Jim Cornwell has agreed on the emergency procurement venue and states that this funding action is required to be done in a public setting via resolution.

The resolution will be on Wednesday's agenda but I wanted to go ahead and receive an informal "vote" digitally for planning purposes. Rob and I can answer and additional "detailed" questions if you have any.

Please respond with input by Monday so that we can expeditiously move forward with this request.

Thank you,

Quinn

Quinn,

As you are aware, we have been limping by without a *permanent* final stage filtration air compressor at the WWTP for some time, while investigating the appropriate replacement and allocating the replacement budget.

The replacement cost was included in the FY20 request and is included in the FY20 "Contingency" line item (501-046000-5836) for WWTP

As you know, Reid Engineering (the WWTP design engineer) was contacted to evaluate the options that we had identified, and to make their recommendation. Please see below.

Attached are the bids received, including Reid's selection as the best option. (just under \$85,000 for the recommended replacement equipment) Town staff has the capability and will install such to reduce the total expenditure from the projected \$130,000.

Multiple temporary compressors (at a cost of \$4,000 per month for rent and fuel) have burned up (9) while determining the most effective replacement and the funds. Each time it fails, we run the *risk* of non-compliance (if it were to fail *during a high flow event*). This critical component of the treatment facility needs to be replaced ASAP with a rotary screw compressor as per concurrence and recommendation by Reid Engineering below. (The original was a reciprocating compressor and we experienced numerous failures since 2009). Please endeavor to attain Town Council's approval to purchase ASAP, as I believe such approval is appropriate with such a large expenditure. A hand copy of the Requisition is at the front of attached document. I will anxiously await your and Council approval to process through Edmunds.

Rob,

John is traveling and he wanted to let you know that he recommends the Compressor from Parkson. He likes the fact that it is a rotary screw compressor which are better. Many of our of our clients are going with rotary screw blowers which are less horsepower and less maintenance which is the same case on the proposed compressor.

I attached a layout drawing as well.

Let us know if you need anything else.

Re: Town past donation to the Colonial Beach Humane Society

Mr. Robertson,

Over the past several years the Town of Colonial Beach has donated to the Colonial Beach Humane Society in the amount of \$500.00 dollars. We are asking if you would still keep donating as the Town has over the past several years. These proceeds help the Humane Society with assisting with spaying and neutering of the stray cats in order to try to reduce the cat population down. These proceeds also assist with buying food to feed cats that currently have no home and to assist with injured homeless animals. This year the Colonial Beach Humane Society has had 75 cats spayed and or neutered. Each female cat can go into heat every three to four weeks and the gestation period is 60 to 65 days.

Your consideration in this matter is greatly appreciated.

Thank you,  
*Patricia Fitzgerald*
